26 March 2019
in Darmstadt

Wafer Level Optics 2019

Due to their small size and competitive costs-to-performance ratio wafer level optics products have found their way into various markets like consumer electronics or automotive. New technological developments and an increasing demand for high volume production puts wafer level optics in the focus of industry and research alike.

The "Photonics Hub Symposium - Wafer-Level Optics 2019" will offer a **platform to promote the dialogue and discussion** between engineers, researchers and users in the field of innovative wafer-level optics technologies for manufacturing, metrology and application.

Symposium Facts

Topics:

- Manufacturing
- Metrology
- Materials
- Applications

Talks by:

- AEMTec GmbH
- Aixtooling GmbH
- Evatec Europe GmbH
- Fraunhofer IOF
- Fraunhofer IPT
- Fraunhofer IZM
- Nanoscribe GmbH
- OPTOCRAFT GmbH
- SUSS MicroOptics SA
- TRIOPTICS GmbH
- etc.

Sponsor and Exhibitor Package

As a sponsor you have the opportunity to present your wafer level optics products and services.

The **Sponsor Package** includes:

- Attendance fee for 1 participant
- Table top space for exhibition during breaks (table size 140 cm x 70 cm)
- Space for 1 roll-up (max. width 85 cm)
- Logo on event flyer and website

370,00 € (+19% VAT)
