

Sponsor Package

Date: 29th/30th October 2019

Venue: Hanau, Germany (Congress Park Hanau)

High resolution and low power consumption are only two advantages of microdisplays. Their small screen sizes allow for their application in digital cameras and head-mounted displays.

The “**Photonics Hub Symposium - Microdisplays 2019**” will offer a platform to promote the dialogue and discussion between engineers, researchers and users in the field of innovative microdisplays technologies with a strong focus on VR/AR applications.

The program includes:

- Sessions on **LCoS, microLED, OLED and DLP** technologies
- Focus session on **VR/AR applications**
- Accompanying **tabletop** exhibition

We invite you to join us as sponsor!
